Re: Proposed Part 70 Permits Submittal
E&B Natural Resources Management Corporation South Cuyama Stationary Source

Dear Mr. Rios:

Attached are three Santa Barbara County Air Pollution Control District (District) Proposed Part 70 'renewal' permits: Permit to Operate 7250-R8 (South Cuyama Unit), Permit to Operate 8010-R7 (South Cuyama I.C. Engines), and Permit to Operate 9136-R6 (Gas Plant 10) for the E&B Natural Resources Management Corporation's South Cuyama Stationary Source. The renewal permits comprise the fourth renewal of the Part 70 permits for this oil and gas production facility. This source remains a major source of reactive organic compounds and carbon monoxide emissions.

We plan to issue these permits as final after June 27, 2011 provided your office has not objected to such issuance before this date.

If you have any questions regarding these permits, please call Phil Sheehan of my staff at (805) 961-8876.

Sincerely,

Michael Goldman, Manager
Engineering & Compliance Division
